

# Curriculum Vitae

## Personal Details

Name **Ignacio E. Olivares**

Cerro Tronador 880, Dp. 41,  
Las Condes, Santiago, CHILE  
Tels: (2) 212 6707, (9) 222 9322  
[ignacioolivares@usa.net](mailto:ignacioolivares@usa.net)

## Academic Records

- **1992** Dr. rer. nat.(**Ph. D.**).  
Ruhr Universität Bochum, Bochum, WEST GERMANY
- **1987** Magister en Ciencias Exactas Mención en Física (**MSc. in Physics**)  
Pontificia Universidad Católica de Chile
- **1986** First Class Honours in Physics,  
Pontificia Universidad Católica de Chile (PUC)
- **1984** Licenciado en Física, (**BA in Physics**)  
Pontificia Universidad Católica de Chile, Santiago, CHILE

## Theses

### Doctoral Thesis (Dissertation):

Untersuchung dichter Edelgasplasmen am Gas-liner Pinch (Study of dense noble gas plasmas at the Gas-liner-Pinch).

### Masters Thesis:

Diseño y construcción de un laser de rubí. (Design and construction of a rubi laser).

### B. Sc. Thesis:

Polarización espontánea para esferas de distinto radio (Spontaneous polarization of spheres with different radii).

## Positions

- **2001-2003** Assistant Professor, Departamento de Fisica, Facultad de Ciencias, Universidad de Santiago de Chile
- **1993-2001** Full-Senior Physicist at Comisión Chilena de Energía Nuclear (CCHEN) leading up to four Ph. D in physics (*PI-I&D in Lithium Spectroscopy*, CCHEN 391, Fondecyt1950183)
- **1993** Research Assistant, EU-GRANT at PUC, *POSTDOC Position*
- **1987-1992** DAAD-Grant, RUB
- **1982-1984** Research Assistant at PUC, PUC-Grant

## School

- **1975-1978** Secondary School: Colegio Alemán de Valparaíso, Valparaíso.
- **1967-1974** Primary School: Colegio Alemán de Viña del Mar, Viña del Mar.

## Career Highlights

- Theoretical study of the spontaneous polarization and surface modes of a pair of dielectrical spheres.
- Construction and operation of a Q-Switched Rubi Laser and study of the control of modes in different cavities.
- Use of electrooptical devices
- Development of a Thomson scattering experiment and measurement of plasma parameters in dense plasmas.
- Introduction of ICCD detection technique for Thomson-Scattering experiments.
- Development of a general numerical procedure to evaluate Thomson scattering spectra in the coherent scattering regime for different ions.
- Study of emission lines of dense plasmas in a Gas-liner Pinch.
- Demonstration of the ability to observe saturated absorption spectra using a diode laser.
- Study of collisions by means of Doppler-free spectroscopy (experimental and theoretical)
- Measurement of resonance ionization spectra of lithium isotopes using a diode laser.
- Construction of a lithium ion beam and mass spectrometer for lithium ions.
- Lithium isotope separation using tunable diode lasers

Experience in programming with Borland C++, Pascal, Fortran; LabView, Matlab, data adquisition with GPIB and ICCD and novel user of Microsoft Windows.

## Areas of interest:

- Optics and photonics, design and engineering
- Nonlinear optics
- Laser physics and engineering
- Ultrasensitive and ultrafast photon detectors

## Languages

- Spanish
- English (fluent). TOEFL, Michigan (83%)
- German (fluent). Sprachdiplom II Stufe, Kultusministerkonferenz BRD (1978)

**Brief career outline:**

Since 1994 Ignacio has been installing a laser spectroscopy laboratory at CCHEN. The main objective is to create the instrumental, theoretical and experimental conditions for a good level experimental physics development at CCHEN. He also has demonstrated hands on experiment the successful use of high-resolution tunable diode lasers in the area of Doppler-free spectroscopy, resonance ionization of lithium isotopes and lithium laser isotope separation.
